Industry Experience

Google

Sr. DevRel Developer (L5)

2020 – Now

Toronto, ON

- Technical lead for flagship Google Cloud reference architectures, Microservices Demo and Bank of Anthos, showcasing cloud-native best practices, totaling 21,000+ stars.
- Strategized the Developer Experience (DX) roadmap for Google Kubernetes Engine (GKE), identifying critical friction points and implementing workflows that reduced developer onboarding time.
- Created and maintained sample applications and client libraries for GKE products.
- Produced high-authority technical content (tutorials, labs, architecture guides, and articles).
- Presented talks and delivered workshop labs at conferences and workshop events.
- Cross-functional collaborator with product and engineering teams to advocate for developer needs.

Dell EMC

Sr. Software Developer (L7)

2018 – 2020

Moncton, NB

- Developer on a software offering for storing and analyzing high volumes of streaming data.
- Led a team of five developers to implement and streamline product upgradability.
- Implemented feature from PoC to release to reduce latency and improve data throughput tenfold.
- Developed Kubernetes operators and service brokers for Pravega and Flink analytics.
- Led a team of quality assurance engineers to develop and refine new testing processes.
- Designed and developed a flexible Kubernetes PaaS installer used in multiple projects.

Projects

XIV ToDo

Creator and Lead Developer

2021 – Now

<https://xivtodo.com>

- XIV ToDo is a companion web app for the massively multiplayer online game, Final Fantasy XIV.
- Built from scratch using Vue.js, Firestore and Cloud Run, and available open source on GitHub.
- Receives a sustained 500+ daily active users and 700,000+ yearly page views.

Education

Mount Allison University

B.Sc. Computer Science

2014 – 2018

Sackville, NB

- President of the Mathematics and Computer Science Society.
- Senior team member for the International Collegiate Programming Contest.
- Teaching Assistant for the Department of Mathematics and Computer Science.
- Peer tutor for the Meighen Centre for Learning Assistance and Research.

Technical Strengths

Languages

Go, Python, Java, JavaScript, C++, Shell

AI

Gemini, Vertex AI, ADK, MCP, Copilot, LangChain

Web

HTML5, CSS3, JavaScript, Vue.js

Tools

Git, Google Cloud, Kubernetes, Docker, Terraform, Atlassian, Jenkins, Ansible

Concepts

Algorithm Design, RESTful Principles, Agile Methodologies

Systems

Linux, macOS, Windows
